11 OUR VALUES ⁶⁶

SUSTAINABILITY /66 - STAY FAMILY /67

Salty is a feeling

It's getting wild on the ocean,
the sea spray all over our faces.

It's part of who you become
when you're out there, lost with friends.

It's the salt encrusted in us
after a long day playing with the waves.

After shower the salt is gone,
but the feeling stays there.

Stay salty.

Stay salty no matter what

It is our passion for water that is expressed through our brand.

We are passionate and we surround ourselves with passionate people.

Keep it in the family

Our brand has been 100% owned and run by the same family since its inception.

We are building our business to last for generations, not just our lifetime project.

Support local shops

We started from nothing and we support today those who supported us yesterday.

Let's keep the experience of entering a surf shop alive for future generations.

Core principles

Marketing to inspire

We use marketing to inspire, to gather and to encourage everyone to spend more time out there.

Our products are made to brave the worst conditions, we want to see them used wisely.

Quality is our speciality

We offer high-quality products. We are experts in innovation, creating high-performance and durable products.

We work hard so that no one has to get out of the water because it's too cold or they don't feel comfortable.

Stay green

At MANERA, we have decided not to base our marketing on the «Eco-friendly» aspect, because our strength lies in the performance of our products.

We have therefore chosen to explain, with full transparency, the actions we are implementing for the environment on our website.

Manera

NEWS 2025

x

New Seafarer

Our classic SEAFARER, only supercharged.

The SEAFARER brings us back to the essentials of what makes a good wetsuit, nothing more, nothing less: warmth, comfort, durability. It's a no-bullshit wetsuit with MANERA's renowned fit and construction.

With the 2025 SEAFARER, our goal was to offer a quality wetsuit with the best possible value for money. The result is a wetsuit featuring all the SEAFARER+ technologies and fabrics, retailing at 320€ for a 4.3mm. (-25% compared to the 2024 SEAFARER+, with the exact same technologies).

It becomes a no-brainer for a customer that wants high quality without "breaking the bank".

In order to make sure everyone can find the right SEAFARER, we have added new models and thicknesses: Women, Men, FZ, BZ, Hooded, Shorties... The SEAFARER range is as complete as possible.

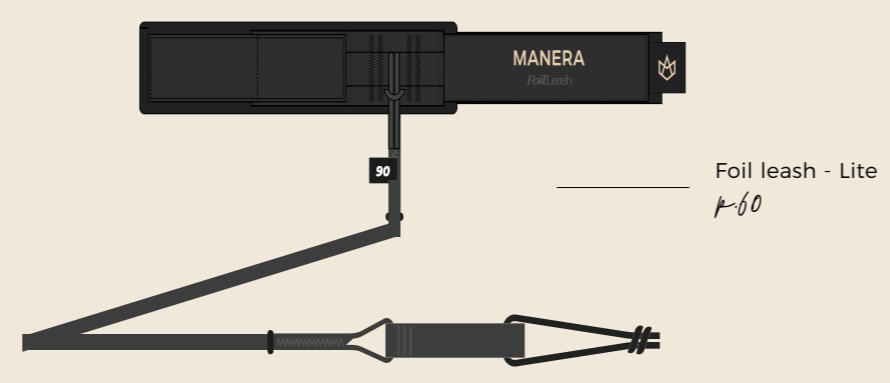

NEWS 2025

x

New Foil leash - Lite

The FOIL LEASH - LITE is a lighter, more compact version of the FOIL LEASH.

Built using a very similar process to the F-ONE wing wrist leash, the FOIL LEASH goes unnoticed while riding. This technology allowed us to use a reduced diameter, and a shorter length leash, that won't drag in the water or get tangled inside your foil. The specific bungee softness has been designed to make sure the board doesn't slingshot back to you during a wipeout.

x

New Neoprene boots

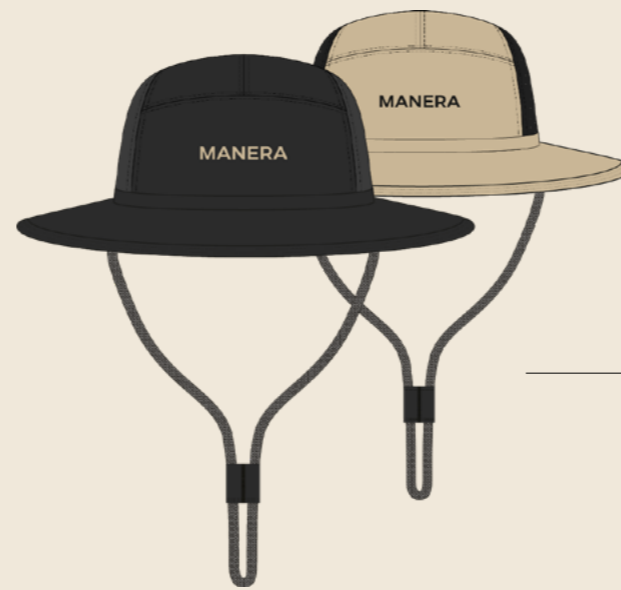

We have updated all our neoprene boots patterns for 2025.

The cuff features two vertical panels instead of a horizontal one, increasing its flexibility for a better entry. Once inside the boots, the upper flexible panel increases comfort without compromising support, as the side panels have been kept intact.

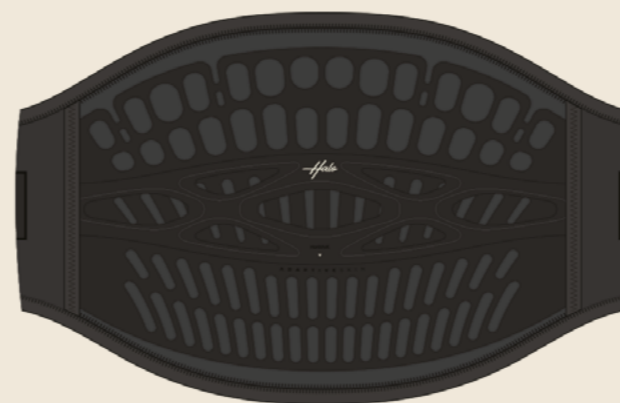

The result is an easier entry, a better overall comfort, and an increased durability.

NEWS 2025

Bobby - 5 panels
P-55

Halo V2
P-57

x

New Bobby - 5 Panels

The BOBBY is not an average hat. Built in the same fabric as our technical boardshorts, it is made to be light, to dry fast and to resist against UV rays and saltwater.

The "5-panels" version features mesh panels on both sides to improve airflow and prevent overheating during the warm summer days. The fit is also conceived for action: fitting closer to the head, the 5-panels version will hold better in the strong wind and waves than our standard BOBBY.

It is meant to spend the day out there: Before, during and after your sessions.

x

New Halo V2

Our HALO harness encountered great success for its innovative technology, but it lacked reliability. We have worked very hard to correct this and came up with a flawless V2.

The "Adaptive skin", "Pivot Inter" and "Pivot Exter" parts have been redesigned to provide a much higher resistance without compromising comfort. Thorough testing has been conducted at the factory and inside our office's lab, under the same protocol as for the Quick Release ISO norm.

Our goal for that V2 is to offer our breakthrough technology in a harness that you can trust.

NEWS 2025

x

New Deflater Bag

The DEFLATER BAG, unlike the more versatile OFFSHORE VEST, is dedicated solely to downwind deflators. Made of ripstop and Dacron from kites and wings, it's ultra-light, waterproof and resistant, so you don't feel it on your back. Compression straps and Velcro fasteners secure it to your back when empty and when riding upwind. Then, its large pocket and roll-top closure allow you to fit a wing of 5m² or more inside. An opening on the underside allows water to be drained off when the wing is stowed away, and the ultra-simple closing system ensures that no water enters once the wing is inside, even during heavy falls. It also features a compartment for a hydration pack (non included).

The DEFLATER BAG is the ultimate gear for your downwind deflators!

FACTORY POWERED WITH SOLAR ENERGY

+

DOPE DYEING CONSUMES 60% LESS WATER

+

RECYCLED/COMPOSTABLE PACKAGING

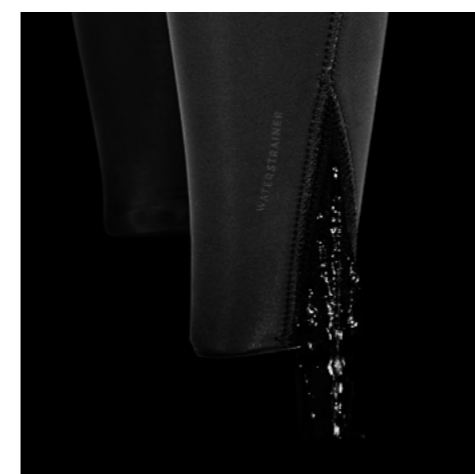

Technologies

- 1 SD² TAPE II**
- Triple glued / Blind stitched / Inside tape welded by an air heater machine
 - New material brings more durability & Flex
 - 100% waterproof

- 2 SEALING PRINT**
- Keep the water away
 - Keep legs & arms panels in place

- 3 WATER STRAINER**
- Drains the water out of the leg
 - Continue the session in the best possible conditions

CHARACTERISTICS

ALT stands for « Alternative ». We have built a greener alternative to conventional wetsuits, with performance in mind. It features a 100% natural YULEX rubber and recycled jerseys besides our standard sustainable processes.

WE BELIEVE THE ALT REPRESENTS A NEW GENERATION OF HIGH-PERFORMANCE WETSUITS THAT HAS A MORE REASONABLE IMPACT ON THE PLANET.

M+

- MAGMA PLUS**
- New generation of thermal materials that insulates & keep you warm
 - Best drying time on the market
 - Lighter than a classic fleece

RECYCLED JERSEY

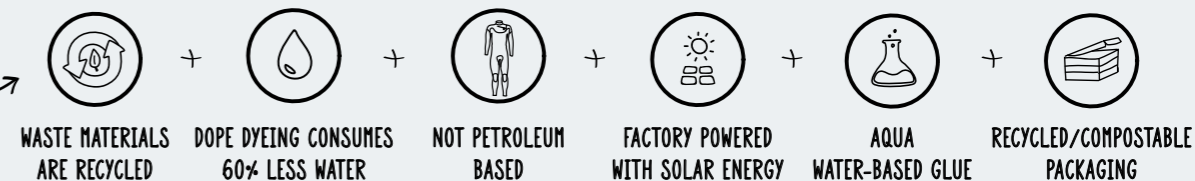

- RECYCLED JERSEY**
- Assembled with recycled nylon jerseys
 - Stretch & light
 - Provides smooth & silky feeling on the skin

AIRFOAM NEOPRENE

- AIRFOAM**
- Made to be light, improving comfort & endurance
 - Best flex & insulation on the market
 - Quilted touch

SUSTAINABILITY

Technologies

- 1 SD² TAPE II**
- Triple glued / Blind stitched / Inside tape welded by an air heater machine
 - New material brings more durability & Flex
 - 100% waterproof

- 2 SEALING PRINT**
- Keep the water away
 - Keep legs & arms panels in place

- 3 BACK KNEE EMBOSS**
- Helps the neoprene to bend more naturally
 - Greater comfort during flexion

- 4 WATER STRAINER**
- Drains the water out of the leg
 - Continue the session in the best possible conditions

CHARACTERISTICS

The Meteor Magma is made for cold and windy winter days. Its Magma+ fleece acts both as an insulator and heat generator. It also dries 30% faster than a classic fleece.

IT IS YOUR WEAPON OF CHOICE AGAINST WINTER.

KEY FEATURES

BACK ZIP

OUTSIDE

INSIDE

CHARACTERITCS

- We use a PK 8mm zip built in high quality nylon, it is a short zip (30cm) in order to maximize the back flexibility.
- An inside flap covers the back and goes around the neck, it protects the back from the outside zipper and allows a perfect waterproofness. It also adds a few millimeters of thickness to an area that is very exposed to wind.

ADAPTIVE SHELL

A FEW YEARS AGO, WE STARTED THE "ADAPTIVE SHELL" PROJECT, WHICH GOAL WAS TO REINVENT THE KITE HARNESS. THIS PATENTED* TECHNOLOGY IS CHARACTERIZED BY TWO MAIN FUNCTIONS:

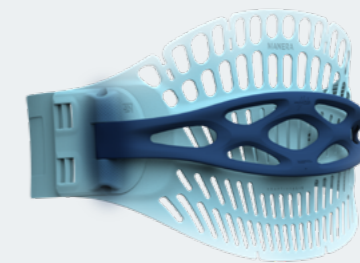

ADAPTIVE SKIN

- is a backing strip made out of flexible material that allows maximum adaptability and freedom of movement to the user.
- It is directly in contact with the body, its function is to provide comfort to the user.

HARDSHELL

- is a rigid arch preventing the harness from folding due to the kite's high loads, and therefore squeezing the user's sides.
- It is not in contact with the user, its function is to sustain all the mechanical forces that the harness endures.

KITE KNIFE
INCLUDED

ASSEMBLING THE ADAPTIVE SKIN AND THE HARD SHELL TOGETHER RESULTS IN THE BEST HARNESS WE'VE EVER MADE. IT PERFECTLY ADAPTS TO YOUR MORPHOLOGY AND TO YOUR MOVEMENTS, WHILE OFFERING AN UNMATCHED SUPPORT THANKS TO AN INNOVATIVE LOADS MANAGEMENT.

HARDSHELL	100%
LIGHTNESS	100%
DURABILITY	100%
PROFILE	Low

THE HALO

A NEW GENERATION OF HARNESS

ARC SPREADERBAR

TECHNOLOGIES

1 CLIP SYSTEM

- The ARC easy-to-clip system is locked once tightened, which provides a precise and smooth riding without improper movements.

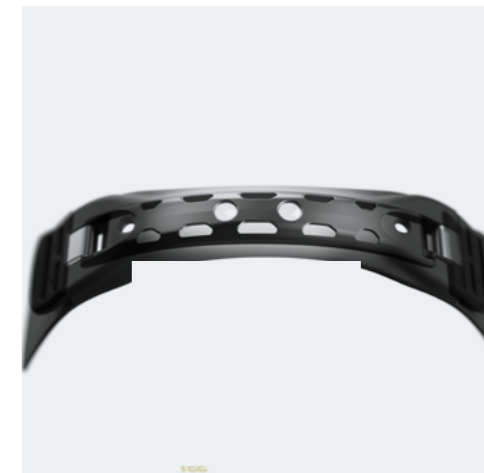

2 SST CORE

- The ARC is built with a robust Stainless-Steel core that is able to withstand 800kg loads, which is much higher than the standard kite requirements.

3 TUCKFLAP 2.0

- Once inserted and locked into the harness, not only they prevent the harness from going up, but they also have an anti-compression function preventing the loads of the kite to squeeze the harness around your hips.

4 HOOK / SLIDING

- The ARC is easily convertible between standard hook and a sliding rope.

R&D HARNESS

Having worked on ergonomic designs for a while, our goal was to push our frame concept to more stiffness, allowing a better support of the back & a lower fit.

But something 100% hard was not an option: Our back needs some adaptability & human morphology is unique.

So here comes the ECLIPSE, a skilful balance between stiffness & flex that brings support where you need it and the freedom to move the way you want.

ADAPTIVE SHELL

- The Adaptive Shell stiffness shades from hard in the center area to softer on the edges
- The stiff center-belt prevents the harness from folding and compressing your body while preserving a good lumbar support
- The softer outline preserves intuitive mobility and adaptability
- It results in a shell that is forgiving where you need flex and stiff where you want support

Technologies

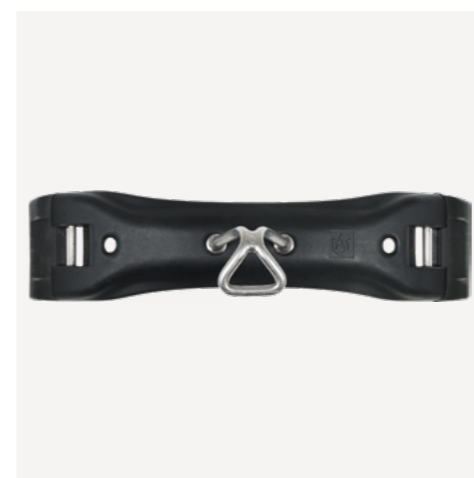

1 GEL FOAM

- The gel foam disperses pressure evenly & efficiently to provide a "pillow comfort", much appreciated during long sessions
- It creates a different sense of feeling while riding as it moves along with your movements, therefore the contact with the harness is more intuitive & it prevents any rash or rubbing discomfort

2 TUCK FLAP

- Flaps are inserted into the harness, they are compressed and locked when straps are tightened
- Stiffen the connection between spreader bar & harness & prevent it from riding up

3 ARC SPREADER BAR

- ECLIPSE & EXO are now delivered with our innovative ARC spreaderbar

4 DOWN HOLD SYSTEM

- The spreader bar has an asymmetrical attachment that distributes the forces downward
- Secured in its original position, the hook does not ride back up

R&D HARNESS

It is difficult to improve upon a harness like the EXO, but we learned a lot by developing the ECLIPSE and so we used this experience to redesign our top harness.

We've applied Adaptive shell technology to our EXO model to give it better support, improved weight and durability. The EXO uses a more rigid frame incorporating different levels of stiffness.

ADAPTIVE SHELL

- The Adaptive Shell stiffness shades from hard in the center area to softer on the edges
- The stiff center-belt prevents the harness from folding and compressing your body while preserving a good lumbar support
- The softer outline preserves intuitive mobility and adaptability
- It results in a shell that is forgiving where you need flex and stiff where you want support

Technologies

- 1 SINGLE FOAM**
- Thermoformed one-piece foam backing
 - Much lighter than multiple foam layouts used in some harnesses
 - More durable as there are less parts to be glued or stitched together

- 2 TUCK FLAP**
- Flaps are inserted into the harness, they are compressed and locked when straps are tighten
 - Stiffen the connection between spreader bar & harness & prevent it from riding up

- 3 ARC SPREADER BAR**
- ECLIPSE & EXO are now delivered with our innovative ARC spreaderbar

- 4 DOWN HOLD SYSTEM**
- The spreader bar has an asymmetrical attachment that distributes the forces downward
 - Secured in its original position, the hook does not ride back up

LIFT WING HARNESS

LIFT "lift", noun: getting a free ride as a passenger.

For us at MANERA, a wing harness is there to go unnoticed when freeflying while providing the necessary support to go back upwind.

That's why we have developed a light and adaptable harness with a low profile. See it as a "lift" back to the top of the downwind slope!

FREEDOM OF MOVEMENT / FREEFLY

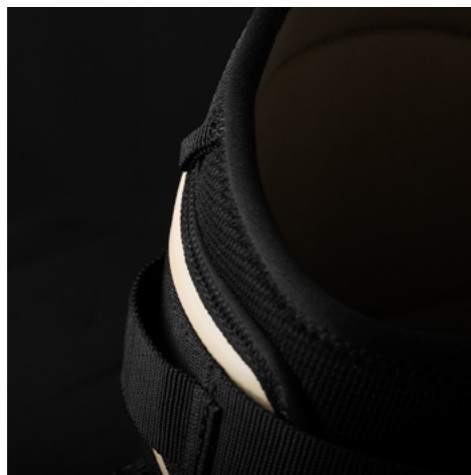

The low profile, soft outline and light construction of the LIFT provides a "like you're wearing nothing" feeling.

ADAPTIVE SHELL / LOW PROFILE

Being significantly smaller than a standard kite harness, the LIFT lays comfortably on your lower back.

It features an adaptive shell inside that still provides the necessary support.

Technologies

1 FREE TO FREEFLY

- The low profile, soft outline and light construction of the LIFT provide a "like you're wearing nothing" feeling

2 SLIDING HOOK

- The hook can slide around the front strap, allowing you to move it left or right before laying on your board.

3 LEAH ATTACHMENTS

- The harness features many strong attachments options for your wing and board leashes.

4 KITE KNIFE POCKET

- An easily accessible knife can be a life saver if you (or your friend) get stuck in kite lines or in a fishing net.

NEW **DEFLATER BAG**
DOWNWIND

DETAILS

REF.	22256-1200
SIZING.	Unique
COLORS.	GINGER

The DEFLATER BAG, unlike the more versatile OFFSHORE VEST, is dedicated solely to downwind deflators.

Made of ripstop and Dacron from kites and wings, it's ultra-light, waterproof and resistant, so you don't feel it on your back.

Compression straps and Velcro fasteners secure it to your back when empty and when riding upwind. Then, its large pocket and roll-top closure allow you to fit a wing of 5m² or more inside.

An opening on the underside allows water to be drained off when the wing is stowed away, and the ultra-simple closing system ensures that no water enters once the wing is inside, even during heavy falls.

It also features a compartment for a hydration pack (non included).

The DEFLATER BAG is the ultimate gear for your downwind deflators!

We advise you to use the WING PADDLE ATTACHMENTS we've developed, so that you can secure your paddle along the central strut of your wing.

A word about "deflating":

SUP foil downwind is becoming increasingly popular, but the logistics of a downwinder are complicated. Riding upwind with a wing, deflating, and then paddling out is much more practical: no car, possibility of choosing the length of your DW, etc.

MANERA has therefore decided to create lightweight, practical equipment adapted to this new sport, such as the OFFSHORE VEST and the DEFLATER BAG.

Disclaimer: Downwinding require physical preparation, proper security devices, and assistance at sea. Please do not attempt any downwinders alone or without proper training.

REF.	22246-0302
SIZING.	S-L
WEIGHT.	550G
COLORS.	NAVY

We have fused our BLIZZARD with our high-quality ponchos in order to offer the ultimate winter accessory. The outside features a waterproof, windproof and light shell that protects you from the elements, while the inside towel provides extra warmth and keeps you dry.

Stay warm and dry in the worst winter conditions.

STAY DRY

T E C H N O S

Water / wind repellent

The outside waterproof, windproof and light shell protects you from the elements.

Inner soft towel

The inside towel provides extra warmth and keeps you dry.

Warm hand pockets

The ESKIMO features two hand pockets on the chest, which include a soft towel inside to keep your hands warm and dry.

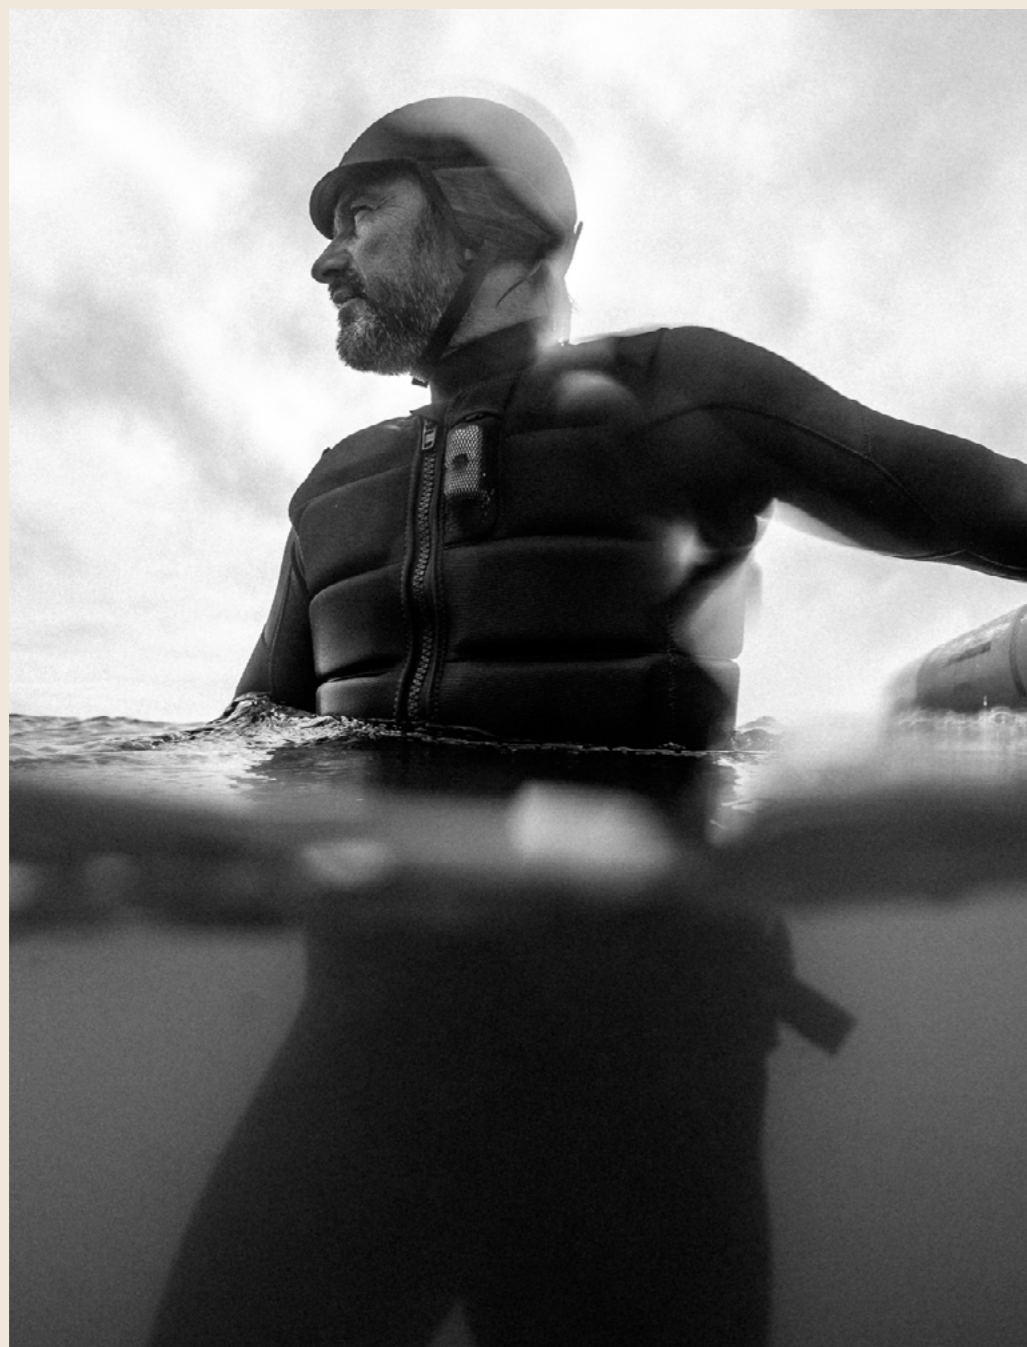

Nylon zipper

The strong, non-corrosive zipper ensures a long-lasting product, even when exposed to saltwater.

Protections.

VAGABOND VEST

IMPACT VEST

DETAILS

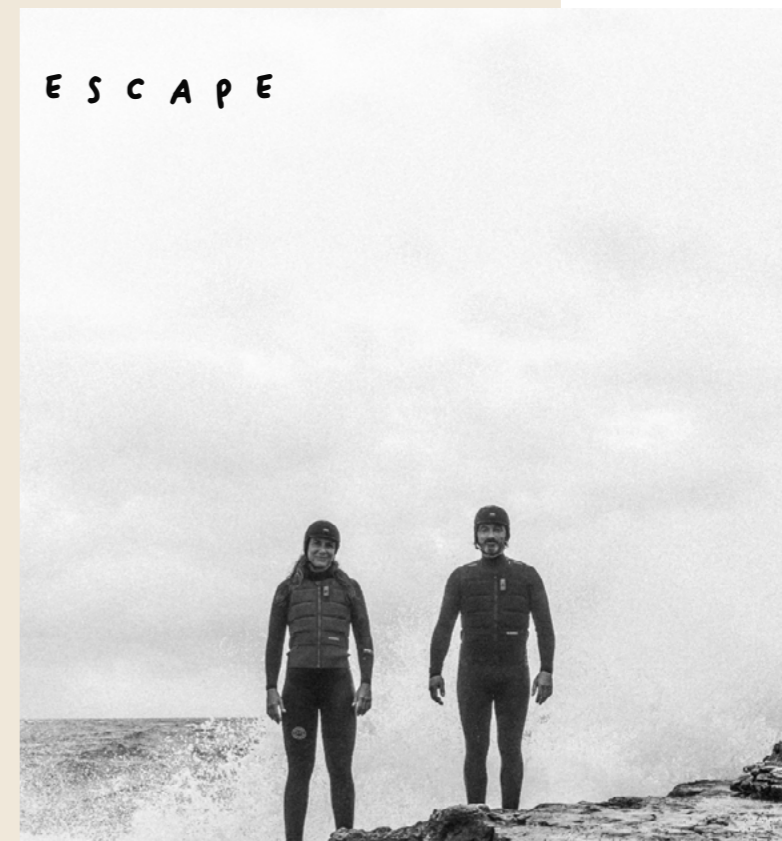

REF. **22245-0501**
 SIZING. XS-S-M-L-XL
 COLORS. GINGER / BLACK

FEATURES

New disciplines often imply new risks. Nowadays, wing foilers are going further offshore to tackle the best bumps. The VAGABOND Impact Vest has been developed to offer a minimalistic, highly comfortable vest featuring all the necessary tools to go offshore.

Be prepared and "Ready to Escape."

READY TO ESCAPE

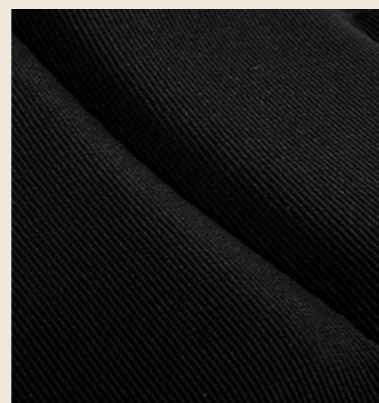

T E C H N O S

Compact & lightweight

Made to provide the best balance between protection and freedom of movement, its thin 15mm foam layer will go unnoticed while riding.

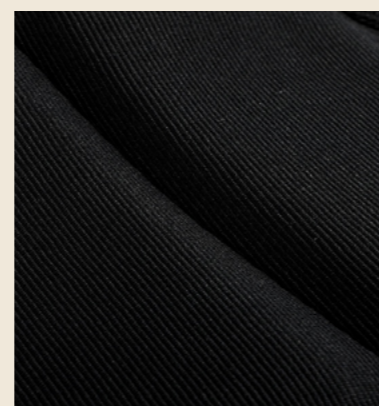

Ready to escape

It features individual PLASTIMMO flashlight, whistle, reflective prints, and leash attachments for your accessories

Big pockets to travel light

Bring your stuff with you, whether it's a tool, some snacks, or your phone; the two front pockets will be useful

Cut-resistant jersey

We have chosen a specific cut-resistant jersey to avoid any bad injuries due to a kite line, a foil, or anything sharp that you could encounter.

SFOAM HELMET

HELMET

DETAILS

REF. **22235-0302**
 SIZING. S-M-L
 COLORS. BLACK

FEATURES

MANERA is investing a lot to build a protective equipment range. With the rise of winging and foils in general, we believe customers will start using protections as much as when skiing or mountainbiking.

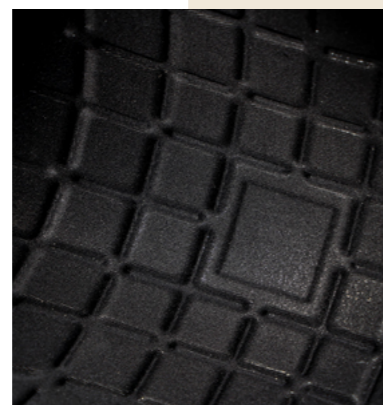

We want MANERA to become the reference.

CE certified

STAY PROTECT

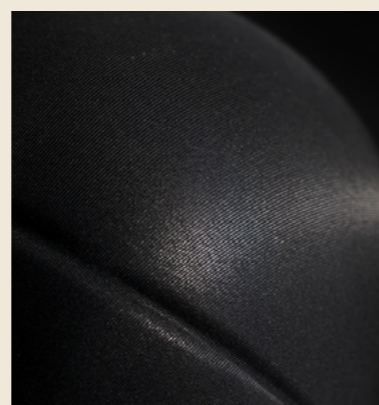

T E C H N O S

"Smart" Foam

S-FOAM (Smart Foam) is made of a non-Newtonian fluid that is soft and flexible at normal state, but instantly becomes stiff when subject to an impact.

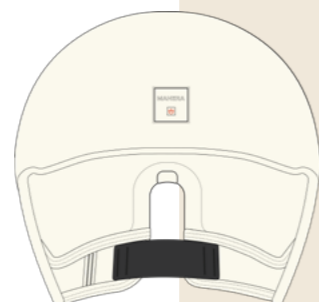

Perfect fit

The helmet is molded into one piece, instead of just trying to assemble a flat pattern into 3D

SUSTAINABILITY

WE CREATE WITH
CONCIENSCIOUSNESS

UNIQUE SUPPLIER

We have a single, trustworthy supplier with whom we have been closely working since 2012.

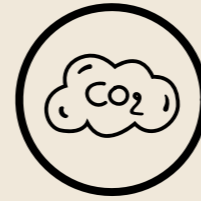

SHEICO is a Taiwanese company that produces our goods in Cambodia, and they also produce most of the world's premium wetsuits. Manufacturing around 45 million wetsuits a year, they can have a huge impact on the global wetsuit market's CO² emissions.

RECYCLED NEOPRENE

Before being cut into several slices of a specific thickness, the neoprene is cooked and then shaped into a clean, rectangular slab.

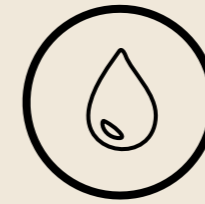

That process involves material waste, which SHEICO recycles and re-uses into finished products, then avoiding industrial wastes that ends up in landfills.

RECYCLED CARBON BLACK

Carbon black is mostly used as a colorant and reinforcing ingredient in the rubber tires industry. It also happens to be a key ingredient in the manufacturing of neoprene.

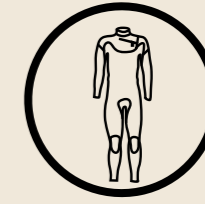

At SHEICO, carbon black is sourced from pyrolyzed used tires, which reduces energy consumption and saves around 200 g of CO² emissions per wetsuit.

DOPE DYEING CONSUMES 60% LESS WATER

Dyeing the fabric consumes a lot of water, so the threads that make up our fabrics are dyed before being woven. This considerably reduces water usage while reducing energy consumption and water pollution. For other colors, SHEICO has invested in a new generation of dyeing machines which consume 60% less water.

**Only on our black wetsuits*

LIMESTONE

All our neoprene goods are derived from limestone rather than petrochemicals.

However, if you think that limestone is much better than oil, think twice.

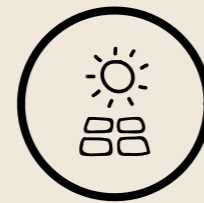

We still chose to use limestone to reduce our dependency on oil and its derived chemicals. Besides, a limestone spill is much easier to clean up than an oil spill, meaning less danger to the local environment.

YULEX

Yulex Pure® is a natural plant-based rubber that provides a cleaner alternative to traditional petroleum or limestone-based neoprene.

The Yulex® company partnered with FSC certified Hevea tree plantations to harvest crude rubber, then uses its unique process to transform it into a 99% pure solid natural rubber.

FACTORY POWERED WITH SOLAR ENERGY

The energy that our suppliers use is a crucial part of a brand's carbon emissions. Having an eco-design is useless if your product is made using non-renewable energy.

Therefore, SHEICO factories are equipped with solar panels to limit the use of fossil fuels, generating around 6,038,486kWh per year.

AQUA WATER-BASED GLUE

The glue that binds the jersey fabrics to the internal neoprene foam is now water-based instead of solvent-based.

This removes volatile organic compounds (VOCs), thus providing a healthier working environment for employees and a cleaner wetsuit against your skin.

RECYCLED JERSEYS

MAGMA & XTEND:

This model features a 83% recycled nylon outside jersey and a 100% recycled nylon inside jersey. It helps reduce waste as well as limit the production of new raw material.

ALT:

This model features a 83% recycled nylon outside jersey, a 100% recycled nylon inside jersey, and a 45% recycled fleece. It helps reduce waste as well as limit the production of new raw material.

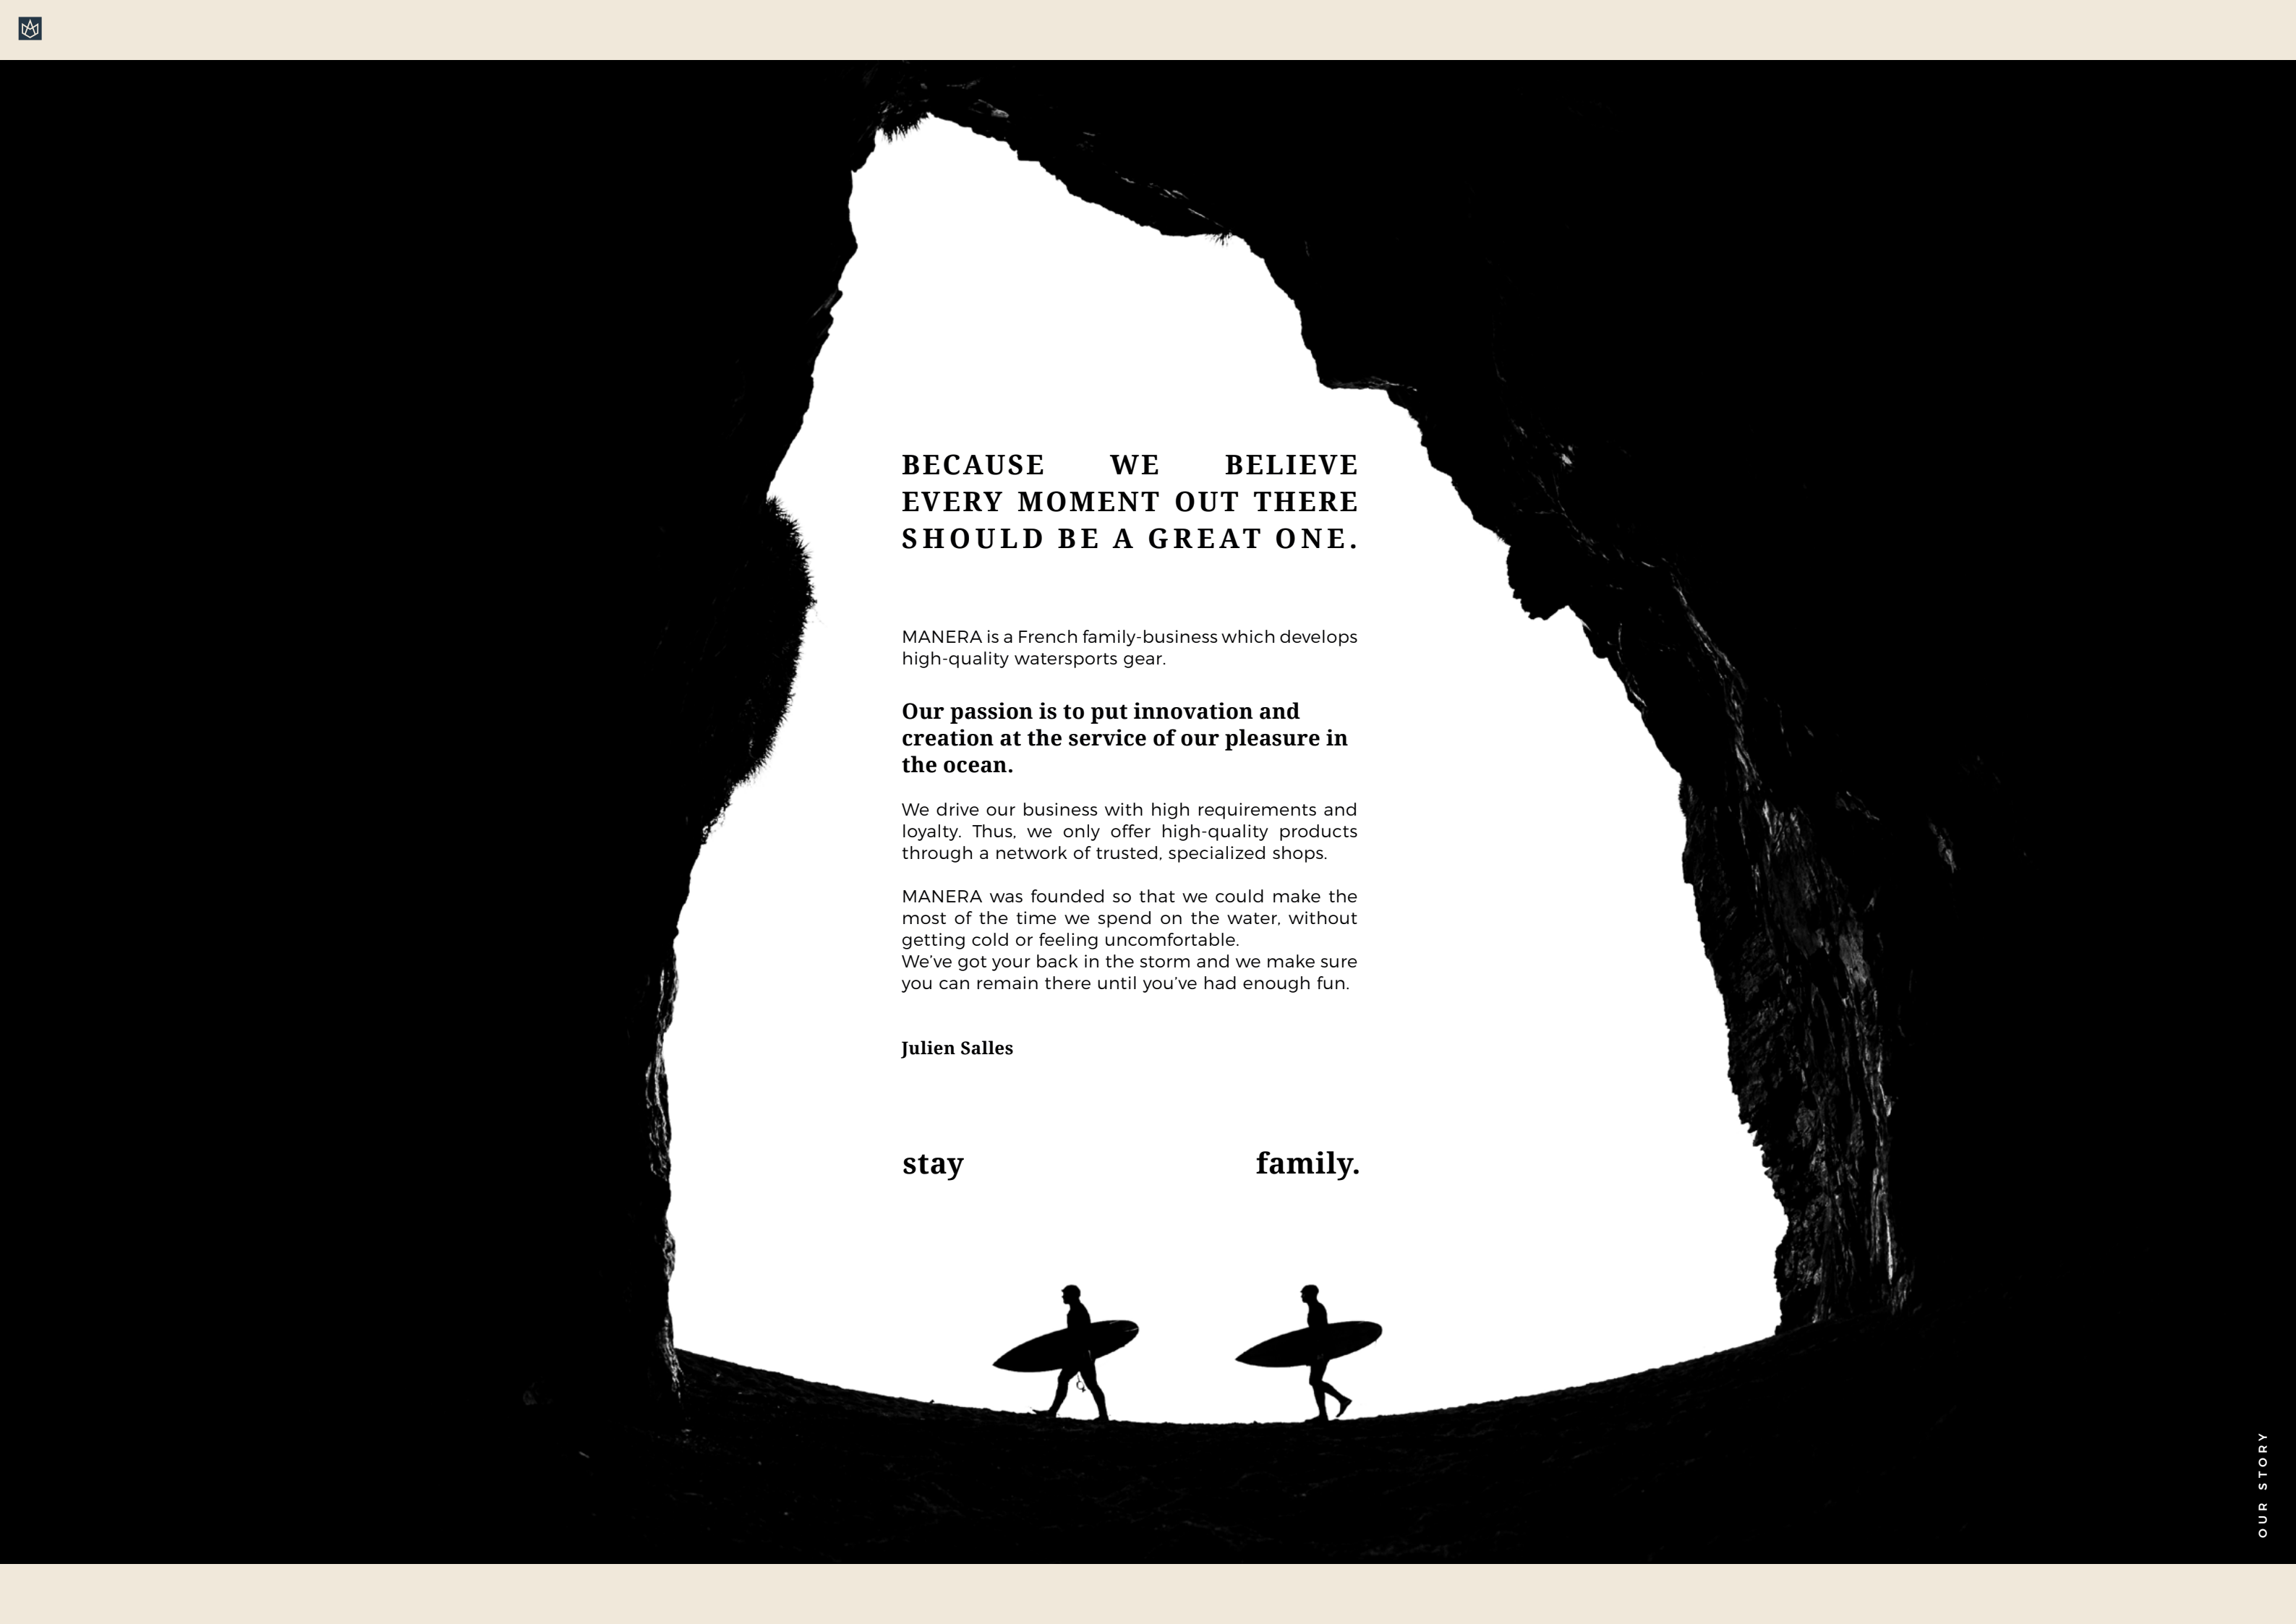

RECYCLED/COMPOSTABLE PACKAGING

We protect our wetsuits from any contact with humidity or the sun so that they preserve their qualities when they arrive in the shop. We use:

- . A recyclable "pizza box" made of 70% recycled cardboard.
- . A compostable/recyclable bioplastic bag (PLA).
- . Compostable/recyclable bioplastic (PLA) anti-crease tubes.

**BECAUSE WE BELIEVE
EVERY MOMENT OUT THERE
SHOULD BE A GREAT ONE.**

MANERA is a French family-business which develops high-quality watersports gear.

Our passion is to put innovation and creation at the service of our pleasure in the ocean.

We drive our business with high requirements and loyalty. Thus, we only offer high-quality products through a network of trusted, specialized shops.

MANERA was founded so that we could make the most of the time we spend on the water, without getting cold or feeling uncomfortable.

We've got your back in the storm and we make sure you can remain there until you've had enough fun.
